AUTOMATION SERIES :
Programmable Logic Controller

DURATION : 3 Days
9:00am - 5:00pm

Training Includes :

+ Overview on PLC
+ Basic Components in PLC
+ PLC Software
+ Configuration in PLC
+ Basic functions in PLC

VENUE :
Co9P, UPM-MTDC Technology Center

Payment Details :
TechCapital Resources Sdn Bhd
Maybank Berhad (562834641995)

Description :

This course has been designed to help equip operators for the future of process control. From here, course participants will return to site ready to conduct complex fault finding, implement PLC logic improvements and to develop control logic for the process / environment in which they are employed

Who should attend?

- Technicians and production workers who wish to use and undertake automation project in manufacturing
- Engineering personnel who wish to obtain knowledge about industrial automation and systems are also encouraged to participate
*Participants should be able to apply the use of basic components in automation.
